

IMPORTANT CHANGES TO THE CIC HANDBOOK

07/03/2017 Attaining a score of 10 after the undertaking Modules One to Three at assessment

To pass a CIC assessment a candidate must score 11 overall. They must score 3 in a module to move on to the next. They must score at least 7 in module one and two to move to module three. However they may score 7 in the first two modules and then 3 in module three which is a total of 10 and therefore not a pass. If this occurs then the lead assessor must write an action plan and the candidate will undertake a further assessment to improve the identified weaker area(s). If the candidate fails this they get one more chance before having to start the assessment process again
